Welcome to AIM 2025

Small State, Big Challenges: Operations Management on the Periphery

in Reykjavik / Hvanneyri

The Future of:

EUROPEAN ACADEMY FOR INDUSTRIAL MANAGEMENT

From AIM homepage

VISION

- AIM pursues to be the leading European Academy developing and promoting education and research in the field of Industrial Engineering and Management (IE&M). As such it endeavours to gather full professors in this field from all corners of the European Higher Education Area (EHEA).

  Developing & promoting EDU + RES

- IE&M education is promoted by classical and modern approaches including problem solving, case study as well as co-creative education. Active learning, instead of teaching, is the preferred point of view of AIM.

  Content of IEM

MISSION

- IE&M is concerned with the design and management of sustainable manufacturing and service systems. Service systems refer to both private and public sectors. Systems design integrates people, materials, information, equipment, and environmental resources into processes that generate value. IE&M also develops operational management methods to maximize process performance. Systems are investigated using both theoretical and experimental industrial engineering and operations research methods.

  Definition of IEM

- AIM promotes networking both in scientific research and educational activities involving main IE&M schools in EHEA. The Academy's mission is aligned with the outstanding schools of engineering worldwide.

  Networking

What is good about AIM – keywords

Word cloud containing the following terms:

see other universities, sociotechnical, shared experience as lead, industrial engineering, iceland, ambitious, international, professor level, sightseeing, teaching focus, its purpose, communication, diversity in perspectives, research, networking, internationality, prosessors only, industrial management, a «different» conference, good scale, community, new research topics, interdisciplinary, exchange of ideas, european, excellence, diversity, network, get to know eu colleagues, senior profs, big picture, fellowship, friendship, international collaborati, focus on teaching iem, unique in industrial mgm, tourist aspect, great colleagues, excellent, education, european representation, interdisciplinarity, attractive locations, get to know eu coleques, short conference, industrial management top, interesting network, technological

AIM would be even better if:

we go beyond the conference

Opens to younger colleagues

More professors

Increase co-working opportunity

We had a clear vision about what we are aiming at

We focuses on Special topics of IM

Improve networking

New profs get involved
Joint active efforts done
Between conf activities initiated

Sharing projects and responsibilities

It develops a strategic plan

If we had more visibility and higher impact.

We learn more about the working areas of the members

More younger fellows. More females.

bet EU funded

New curricula for IM

We would have small group discussions on research,teaching, doctoral education position of IM in universities

Include younger fellows
Make common projects

AIM would be even better if:

New curricula for IM

Young people, new approches and ideas.
Most colaborations
Better knowledge about the activities of the fellows

We had more focus on research and collaboration, e.g. in Joint Projects.
We had more scientific presentations by the AIM fellows at the conferences.
Everyone should bring a poster

We would have small group discussions on research,teaching, doctoral education,position of IM in universities, societal influence, curriculum devt etc.

Reduce the sparetime content.

More active in social networks

Clearer focus on "management"

Set up task forces that have a purpose beyond the conf

Include younger fellows
Make common projects
Conection through CEEPUS and other metworks

Get to know the team, their interests, skills, research aims and current struggles.

If we are Talking about Trends in IM

AIM better if.. text

1. we go beyond the conference
2. Opens to younger colleagues
3. More professors
4. Increase co-working opportunity
5. We had a clear vision about what we are aiming at

7. Improve networking
8. Sharing projects and responsibilities
9. New profs get involved
10. Joint active efforts done
11. Between conf activities initiated
12. It develops a strategic plan
13. If we had more visibility and higher impact.
14. We learn more about the working areas of the members
15. More younger fellows. More females.
16. bet EU funded
17. We would have small group discussions on research,teaching, doctoral education,position of IM in universities, societal influence, curriculum devt etc.
18. New curricula for IM
19. Include younger fellows
20. Make common projects
21. Conection through CEEPUS and other metworks
22. Young people, new approches and ideas.
23. Most colaborations
24. Better knowledge about the activities of the fellows
25. Reduce the sparetime content.
26. Get to know the team, their interests, skills, research aims and current struggles.
27. More active in social networks
28. We had more focus on research and collaboration, e.g. in Joint Projects.
29. We had more scientific presentations by the AIM fellows at the conferences.
30. Everyone should bring a poster
31. Clearer focus on "management"
32. If we are Talking about Trends in IM
33. Set up task forces that have a purpose beyond the conf

Result of voting on improving AIM

1 Increase younger fellows (but professors only) 👍 5

2 Share industrial management education materials 👍 4

2 Extra effort to organise common research and/or education projects 👍 4

2 On line meetings
Better connection between participants 👍 4

5 Joint projets 👍 3

5 Only active members 👍 3

5 Higher involvement of all fellows in carrying out common projects and responsibilities 👍 3

5 Increase creative interaction during conferences, e.g. workshops 👍 3

5 More foresight discussions on trends and upcomming issues 👍 3

10 Small group discussions on educ, research,societal impact etc 👍 2

10 Poster presentation by every fellow attending the conference 👍 2

10 Establish a restart working group with clear tasks 👍 2

10 More innovation activities 👍 2

10 Stimulating collaboration between fellows 👍 2

10 Establish cler working agenda and less vacation :) 👍 2

10 Be a referent organisation 👍 2

10 Increase cooperation with ESTIEM (students) 👍 2

10 Bring more junior profs even as guests 👍 2

19 Increase co-working opportunity 👍 1

19 strategic plan on purpose and initiatives...with task force and clear goals, kpi and deliverables 👍 1

19 Grow activ member base 👍 1

19 Doing what we have decided 👍 1

19 A slot for teaching innovation 👍 1

19 Reduce the sparetime extras 👍 1

19 Better website 👍 1

19 More interaction, less presentations 👍 1

19 Professors have to be include at lectures at different universities 👍 1

19 Topic specific roundtables 👍 1

29 Long term join mulipartner activities 👍 0

29 Being more active in particating in the network. 👍 0

29 — Focus on teaching (there are other conferences for that) 👍 0

29 — Focus on relevant fields in IM with projects 👍 0

29 — Joint Project proposas 👍 0

29 — Task forces of mutuslly important issues, beyond conference 👍 0

29 — Improve the website, make it more informativ and useful 👍 0

29 — Exchange PhD students 👍 0

29 — Icrease publicity in social ntworks 👍 0

29 — Split active and retired members for some sessions 👍 0

29 — Add innovation management to the agenda 👍 0

29 — Choose every attractive locations (like Iceland ıs) 👍 0
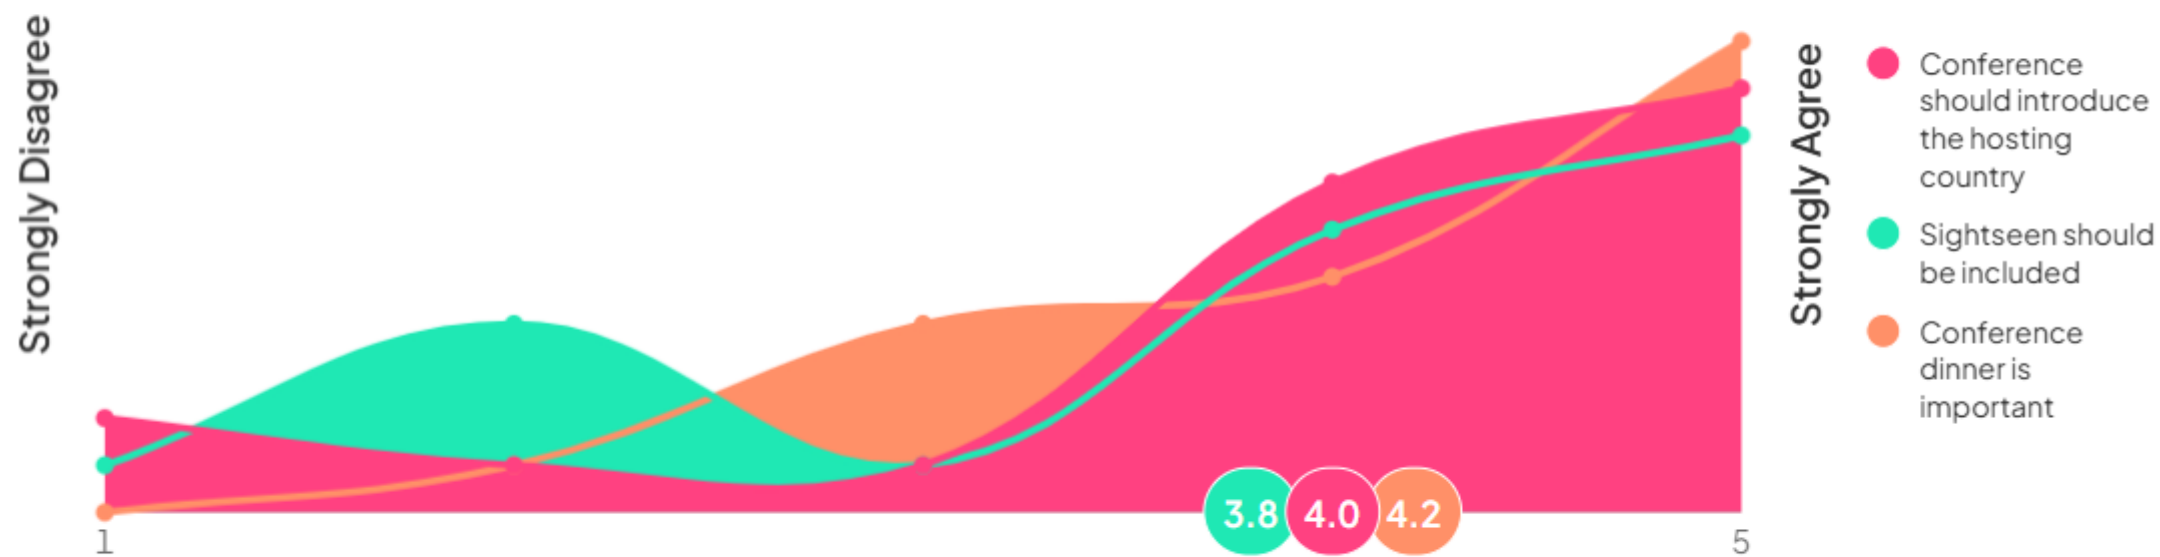

Result of voting on improving AIM - text

- Increase younger fellows (but professors only)
- Share industrial management education materials
- Extra effort to organise common research and/or education projects
- On line meetings
- Better connection between participants
- More collaboration
- Common projects
- Joint projets
- Only active members
- Higher involvement of all fellows in carrying out common projects and responsibilities
- Increase creative interaction during conferences, e.g. workshops
- More foresight discussions on trends and upcomming issues
- Small group discussions on educ, research,societal impact etc
- Poster presentation by every fellow attending the conference
- Establish a restart working group with clear tasks
- More innovation activities
- Stimulating collaboration between fellows
- Establish cler working agenda and less vacation :)
- Be a referent organisation
- Increase cooperation with ESTIEM (students)
- Bring more junior profs even as guests
- Increase co-working opportunity

- strategic plan on purpose and initiatives...with task force and clear goals, kpi and deliverables
- Grow activ member base
- Doing what we have decided
- A slot for teaching innovation
- Reduce the sparetime extras
- Better website
- More interaction, less presentations
- Professors have to be include at lectures at different universities
- Topic specific roundtables
- Long term join mulipartner activities
- Being more active in particating in the network.
- Focus on teaching (there are other conferences for that)
- Focus on relevant fields in IM with projects
